

1.000 years of peace Brieve Morison

We don't want another war
Don't need to know
What the butler saw
We want to try to calm the beast
If we want to fight we should make our peace
We want a thousand years of peace x2

Don't need to know what you meant
We want something heaven sent
We want it back West and East
North and South the most the least
We want a thousand years of peace x2
We want a thousand years x3
We want a thousand years of peace

Don't want the devil don't want god
To decide for us what we want
Leave us alone turn off the heater
Meat is murder it murders meat
We want a thousand years of peace x2

If we decide that's not enough
We'll take some more
There is so much
We will beat this killing disease
We will bring it to its knees
We want a thousand years of peace x2
We want a thousand years x3
We want a thousand years of peace

Countries come and countries go
It's only people that make them grow
Every prisoner must be freed
We must live like we believe
We want a thousand years of peace x2

We took the numbers one to ten
And started to count off time with them
If being conscious is a crime
We are prisoners of our minds
We want a thousand years of peace (to the end)
